MSc Thomas Schreuder

20 YEARS GeoTHERM expo & congress

Ausbildung und Studium / *Education and studies*

Thomas holds a BSc in Mechanical Engineering and an MSc in Petroleum Engineering. He has over 14 years of experience in the oil and gas industry, covering drilling operations, well intervention and project management.
He previously worked for Balance Point Control and Maersk Drilling before joining WellGear in 2019 as Senior Project Manager. Since June 2026, he has been Head of Equipment at WellGear.

Aktuelle Projekte und Tätigkeitsschwerpunkte / Current projects and key areas of activity

As Head of Equipment at WellGear, Thomas oversees the company's operational equipment, including maintenance, certification, logistics and equipment availability for projects worldwide. With his background in drilling and well intervention, he has extensive experience with complex well operations and the equipment involved.
At GeoTHERM 2027, he will present on sidetracking with a hydraulic workover unit (HWO), focusing on the technical and operational aspects of this approach.
