# Rami Niemi

20 YEARS GeoTHERM expo & congress

**Ausbildung und Studium / *Education and studies***

Background in theoretical physics, energy systems and geothermal technology, with previous research and development experience at Aalto University, VTT Technical Research Centre of Finland and the St1 Deep Heat project.

***Aktuelle Projekte und Tätigkeitsschwerpunkte / Current projects and key areas of activity***

As CTO and Founder of QHeat, Rami Niemi leads the development of medium-deep geothermal energy and borehole thermal energy storage solutions. His work focuses on deep coaxial heat wells, borehole thermal heat storage, waste-heat recovery, heat pumps and low-temperature heating and cooling networks.
