## **IADC's Recommendation for How To Drill Geothermal Wells**

*Die IADC-Empfehlung für das Bohren von Erwärmesonden*

**Scott Farmer**

**IADC, Helmerich & Payne**

The IADC Geothermal Committee presents its inaugural project—the IADC Geothermal Well Drilling Guideline. This international code, encompassing an IADC Classification for geothermal well types, aims to inform the drilling industry, foster sustainable well construction, and gain endorsement from the wider geothermal industry. The guideline, focusing on well design, equipment selection, well control, and safety, supports global geothermal energy development.
